## Fractions d'un quadrillage

Lorsque tu dois prendre une fraction d'un quadrillage, il faut :

1. Compter les cases.
2. Diviser par le dénominateur.
3. Multiplier par le numérateur.

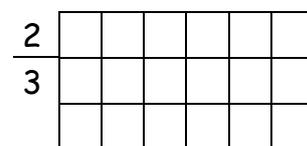

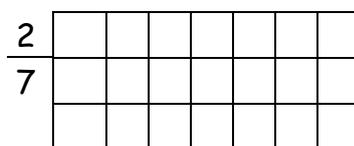

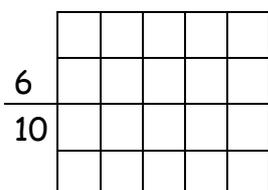

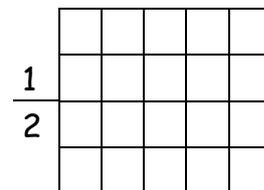

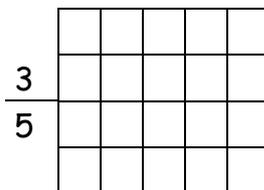

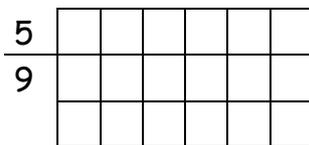

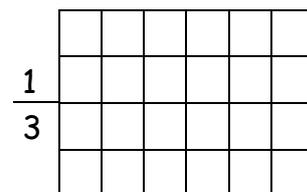

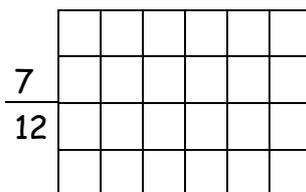

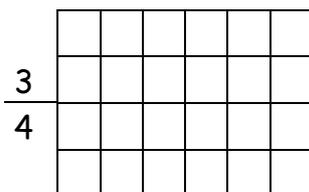

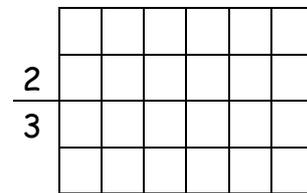

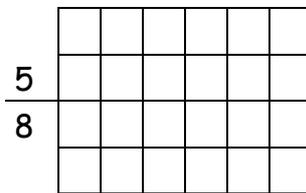

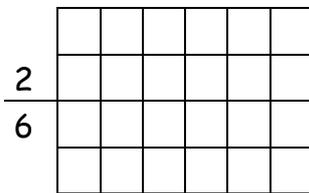

Rappel :     3 → numérateur  
                  8 → dénominateur

\* Colorie  $\frac{3}{8}$

1. Compter les cases :       24 cases
2. Diviser :                 24 cases : 8 = 3 cases
3. Multiplier :            3 cases x 3 = 9 cases
4. Colorier 9 cases

Colorie la fraction demandée en utilisant les étapes ci-dessus.
